AAOHN'S YEAR 2000 CORPORATE STATEMENT

AAOHN has assessed the potential impact of equipment and/or software failure due to the Year 2000 issue. The Association has completed a plan to resolve potential problems that were identified and has obtained assurances from suppliers/vendors and contractors that their systems are, or will be, compliant by the turn of the century. In the event of operational problems beyond the control of the organization, AAOHN has developed an internal contingency plan for key areas to continue to operate until problems are resolved. AAOHN declares Year 2000 compliance of internal software and equipment as of September 30, 1999.
